I. F. Thompson Automatic, Instantaneous Cut-off Slide Valve Engines.

**Design and mechanism entirely new. Conceded by all experts to be the best ever built.
A better cut-off engine than the best Corliss, with all the simplicity
and durability of the common slide valve engine.**

**The Committee of Awards, Mechanics' Institute Industrial Exposition,
San Francisco, 1889, say:**

"This engine, which is of the Automatic, Independent Cut-off class, presents many **radical improvements** upon those which have **hitherto been considered the highest type of steam engineering practice**, inasmuch as the same results are obtained with a great reduction in the number of working parts and joints. The engine is compact, strong, and symmetrical in design, and presents a handsome appearance. It is fitted with four plain slide valves, working entirely independently of each other in separate chambers, all four valves and cut-off being operated with **one eccentric**. It is a remarkable feature of this engine that **all four valves and cut-off are operated with but one joint or working part** between them and the eccentric. The cut-off, which is exceedingly rapid, is operated by steam pressure. Owing to its simplicity, repairs would be reduced to a minimum." Gold Medal.

The governor is very sensitive, a movement of one-quarter of an inch of the balls making all the variation from a closed to a full open port. Typical tests of its thorough control by the governor is shown in the following engines now working:

A 14-inch bore, 30-inch stroke, running our works.

A 16-inch bore, 30-inch " " St. Helena Electric Light Plant, St. Helena, Cal

A 28 inch bore, 48-inch " " Mendocino Saw Mill, Mendocino, Cal.

A 16-inch bore, 30-inch " " New London Quartz Mill, Plymouth, Amador Co., Cal.

A 24-inch bore, 42-inch " " Korbel Bros. Box Factory, San Francisco.

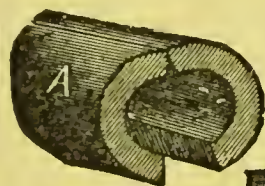

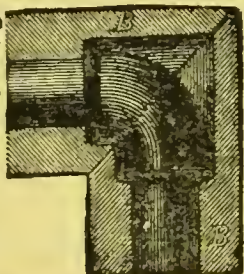

All sizes built. Examine before buying any other kind.

USE QUEEN LILY SOAP

GUARANTEED TO WASH WITHOUT RUBBING.

THE QUEEN LILY SOAP

Has extraordinary merits, and is in good repute with the public, and that is why it is so extensively imitated and counterfeited.

These counterfeits resemble the Queen Lily Soap in appearance and style of packing only. They lack the purity and general excellence of the genuine.

This notice is necessary, as vilely injurious and dangerous imitations, liable to produce chronic inflammation of the skin, are often substituted for the Queen Lily, because they pay a larger profit.

The price of the Queen Lily is as low as consistent with the cost of making such a high grade of pure soap. The price, compared to the quantity and the size of the cakes, makes it the cheapest soap for everybody and for every want. Consumers have simply to insist upon having the Queen Lily, remembering that if any substitute is offered it is for the advantage of the seller.

The Queen Lily is the finest soap known for laundry and general household use. It is made of vegetable oils, and everything used in its manufacture is the purest and best, so it is absolutely pure.

Ladies will find this soap especially adapted for washing laces, infants' clothing, silk hose, cleaning gloves and all articles of fine texture and delicate color, and for the various uses about the house that daily arise requiring the use of soap that is above the

ordinary in quality. For the bath, toilet or nursery it is preferred to most of the soap sold for toilet use, being purer and much more pleasant and effective, and possessing all the desirable qualities of the finest unadulterated White Castile Soap. Respectfully,

FISCHBECK & CLOOTZ,

Manufacturers of all kinds of Toilet and Laundry Soaps.

SAN FRANCISCO, CAL., April 27, 1889.
 MR. H. C. ROBB, Dear Sir:—In response to your inquiry in regard to the 72-inch Gang Edger in our Mill at Hadlock, Washington Territory, we take pleasure in informing you that the same has given us entire satisfaction—not only on account of its cutting register (up to 12x12) but also from its capacity, having run through this machine over 100,000 feet per day of Oregon Pine Lumber, we are willing to vouch for its efficiency. Furthermore, it has edged the lumber for the entire mill. The machine has been in operation for about two years and has given us little or no trouble, always giving as a result true and even lumber. In conclusion we would say that for ease of working, quickness of setting the saws and for firmness for holding the same, we do not think it has an equal.

Very truly yours,

MADE TO ORDER.

KIRKWOOD HARD RUBBER CO.

Proprietors Suction Syringe.

E. BARTSCH, General Manager.

WHAT WE CLAIM FOR OUR SYRINGE :

The double action of suction and force takes place simultaneously.

It is easily inserted.

It is easily kept clean.

Hot water or acids will not affect it.

It can be inserted in any Speculant, we make different sizes.

It insures perfect cleanliness.

It puts the tissues in the best possible condition for medication.

It is most useful for the application of medicated fluids.

Its regular daily use will have a tendency to strengthen the muscular tissues.

It will prevent coagulation and decomposition.

You can screw to the nozzle any tube required on a breast cup.

In cases of severe ulceration, in order to prevent bleeding, the suction can be moderated by fastening a sponge to the nozzle.

All other attachment are furnished by us to the medical profession upon application, for the small additional cost of one dollar.

Physicians will best appreciate the effect of absolute cleanliness in all inflamed and ulcerated conditions, and no woman who has used our syringe will ever do without it again.

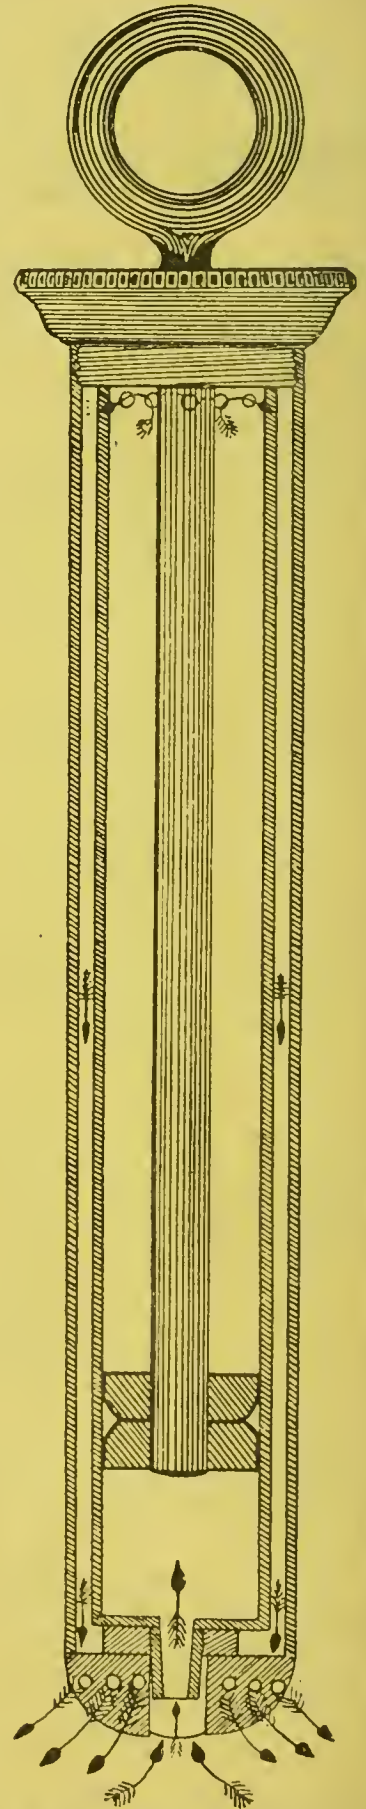

Respectfully,

Kirkwood Hard Rubber Co.

Murphy Building, Rooms 123-124, San Francisco, Cal.

CONSUMERS' ICE COMPANY,

420 EIGHTH ST.,

SAN FRANCISCO CAL.

This ice is made from distilled artesian well water, clear as crystal, and entirely free from the dangerous matter frequently contained in water from streams and ponds. Distilled Ice is now in general use throughout the principal cities of the world, even where Ice Palaces are common, on account of its absolute purity and security against the dangerous zymotic diseases, and commands at least two dollars per ton more than other ice.

It is in regular block form—more dense, packs closer, keeps longer, and is much better adapted for refrigerating and shipping purposes than common ice.

On account of the desirability of this article and the limited output, priority of orders may alone secure a supply.

The rates of this company will be uniform to all persons within a reasonable distance and altitude for like quantities, and should the rates be reduced, by competition or otherwise, all consumers will benefit pro rata in the reduction.

P R E F A C E.

Every effort has been put forth to make this, the thirty-first volume of LANGLEY'S SAN FRANCISCO DIRECTORY, worthy of the high reputation which that work has always borne in this city. Great care has been taken in the compilation. The index to contents has been greatly enlarged, thereby giving readier access to the great mass of valuable information in the first part of this book with reference to societies, public institutions, etc., the most complete, it is thought, contained in any directory in this country. Particular attention is called to another valuable addition to this work, consisting of the numbers and boundaries of each of the congressional, senatorial and assembly districts, and also of the three hundred and ten new election precincts into which the assembly districts were subdivided on the sixth day of January last by the board of election commissioners. Mr. W. H. L. Corran's connection with this work ceased with last year's issue, and on that account more than usual care has been bestowed by the new management upon this volume, which, it is believed, will bear favorable comparison with any of its predecessors.

DIRECTIONS FOR KEY-HOLDERS.—Upon the discovery of a fire near your signal-box, pull down the hook, then wait a few moments, and if you hear no alarm on the large bells, pull down as before. If you still hear no alarm, go to the next box and give the alarm from that. Never open the box or touch the hook except in case of fire. Never signal for a fire seen at a distance. Do not give an alarm for a burning chimney. Be sure your box is locked before leaving it. Upon a third alarm being struck for the same fire it will be considered a general alarm. Second alarms will be turned in only by order of the Chief Engineer or his Assistants.

Keys of the signal boxes are deposited in the vicinity of each box, at such places as are indicated upon cards placed thereon.

The signal boxes in use consist of one hundred and ninety-nine boxes and are all automatic boxes. An alarm from an automatic box is given by pulling down the hook once and letting go, unerring mechanism doing the rest.

Complaints concerning the working of the Fire Alarm Telegraph, irregular striking of the bells and gongs, broken wires, etc., should in all cases be made at the Fire Alarm Office, Brenham Place.

In case of tumult or riot, whereby the services of the Police force are required, an alarm will be given, consisting of ten strokes upon the bells and gongs, repeated five times, which will be a signal for the Police to assemble at the old City Hall. This alarm will be given only by order of the Mayor or Chief of Police.

The telegraph apparatus consists of about one hundred and fifty miles of wire, divided into twenty-two circuits, of which thirteen are signal circuits, or circuits running to the signal boxes. Alarm gongs are located in the different Engine, Hook and Ladder, and Hose houses, each connected with the Central Office by the fire alarm circuits and eight alarm bells for striking the alarm box, located as follows: One on the Hall of the Exempt Fire Co., one on the Engine House on Sixth street, one on the Engine House on Stockton street, one on the Engine House on Second street, one on the Engine House on California street, one on the Engine House on Sixteenth street, one on the Engine House on Bryant street, and one on the Engine House on Pacific street. The bells and gongs are each struck at the same time by electrical machinery.

Colleges and Private Schools.

Notwithstanding the excellence of the free public schools of the city and State, their exemption from direct cost to the pupil or parent, and the great interest taken in them by the public as the nurse and strength of our free institutions, colleges and private schools of great wealth, popularity and importance rise and prosper. That such institutions exist, shows the great interest taken in educational matters. The public and private systems are rivals, each stimulating the other, and setting examples of enterprise, management, salaries, edifices, progress and standard of scholarships. There are in San Francisco over one hundred private schools, in which term are included the select school of a few pupils, the seminaries, commercial schools, academies, convent schools, and colleges, with their thousand students. The School Census Marshal reported the number of youth attending private and church schools in this city in June, 1889 (including Chinese) at 8,250. Many of the private schools having edifices of great capacity, cost and grand architectural appearance.

The school is free of charge to all denominations. It was opened on the 24th of May, 1869, and the number of pupils increasing, made it necessary to enlarge the building, and in 1870 the portion fronting on Ellis street was added. Later on a wing within the enclosure was built, to afford more ample facilities for the improvement of pupils in music, needlework, painting, drawing, etc. The institution contains 500 pupils and a teaching staff of 19 Sisters, and is under the charge of Mother Mary Ignatius McDermot.

The number of students usually in attendance is upwards of 600, with a staff of 27 professors and teachers. The college edifice consists of two main buildings, connected by spacious corridors. On the corner of Grove and Van Ness avenue, the first two stories are used for class and lecture-rooms, and the two upper floors as an exhibition hall. The college will accommodate twelve hundred students. The course of study will be extended as rapidly as the students can be prepared for it, and the trustees can provide the means of maintaining a competent Faculty.

SUGGESTIONS TO THE PUBLIC.

Facilities are given to the post-office officials in the discharge of their daily duties, and greater security afforded to the public, by careful attention to the following recommendations:

Make the address on letters legible and complete,

giving the name of the post-office, county and State. The name of the street and number of the house should also be given on letters addressed to cities where letter carriers are employed; while the letter will eventually reach its destination without a number, the omission is often a cause of hesitation and delay. In the case of letters for places in foreign countries, the name of the country as well as the post-office should be given in full. Letters addressed, for instance, merely to "London," without adding "England," are frequently sent to London, Canada, and vice versa, thereby causing delay, and often serious loss.

FREE POSTAL DELIVERY.

The Free Postal Delivery System is similar to the one so successfully maintained in several of the large Eastern cities. There are ninety-three districts, each of which is in charge of a carrier, who delivers promptly all mail matter received at the Post Office, upon which is written the correct address, street and number of the party for whom it is intended.

All persons who desire their letters, etc., retained until called for, must leave their address at the Post-Office.

M.; Sundays from one o'clock to two o'clock P. M.

PUBLIC STREETS, AVENUES, SQUARES, PLACES,
OF THE CONSOLIDATED
CITY OF SAN FRANCISCO,
IN ACCORDANCE WITH THE OFFICIAL MAPS, 1868, 1870, AND 1872
AND SUBSEQUENT ORDINANCES

EXPLANATORY.—The Ordinance for re-numbering the buildings of this city provides that "Market Street shall be the starting point for the numbers of all buildings fronting on the streets running therefrom in a northerly direction, and also for those running therefrom in a southeasterly direction. The streets laid down in the official map of the city as forming the water front thereof shall be the starting point for numbers on all streets running westerly and southwesterly therefrom, except upon such streets running westerly commencing from Market Street, and upon all such streets, Market Street shall be the starting point for numbers. On all streets the numbers on the right hand side, starting from the point of beginning, are even numbers, and on the left hand side, odd numbers. One hundred numbers, or as many thereof as may be necessary, shall be allotted to each block bounded by principal streets; numbers 100, 200, and 300 being respectively the numbers for commencing the blocks distant one, two, and three streets from the starting point on the side designated for even numbers, and numbers 101, 201, and 301, in similar manner for the opposite side of the street, throughout its extent; so that the initial figure of the number placed on a building at any street-crossing shall indicate the number of main streets such street-crossing is from the starting point. Not less than twenty feet in frontage of all vacant lots of ground shall be allowed for each number. On all cross or intermediate streets the numbering shall commence where said streets begin, and shall conform to the plan specified in this Order."

By this new decimal system of numbering buildings, the exact location of any number is readily ascertained; for example, if you want to find 624 Montgomery, it is on the east side of the block extending from Clay to Washington, which is the seventh from Market—Commercial and Merchant being private streets. Again, 825 Clay is on the ninth block from the water front, which is the one extending from Dupont to Stockton. It must be borne in mind that one hundred numbers are allowed on each block between principal streets.

The following streets are but partially opened, and each differ materially from the plan originally laid out, viz: Clementina, Ecker, Jessie, Minna, Natoma, Ritch, Shipley, Stevenson, and Tehama.

The territory lying west of Laurel Hill and Odd Fellows' Cemetery, and generally known as the Outside Lands, has recently been surveyed, and is designated on the new official City and County Map as avenues and streets. Those running north and south are named respectively from First to Forty-ninth avenues, and those running east and west, from First Avenue to the Ocean, and parallel with Point Lobos Avenue, A to W streets.

Reference is frequently made in the Register of Names to the following, and which are located as follows: Hoadley's Addition, situated west of Pierce and between Geary and Washington; Horner's Addition, south and near the Mission Dolores; Western Addition, west of Larkin; San Miguel Ranch, southwest and near the Mission Dolores; Bernal Heights (B. H.), south of Twenty-sixth Street, between San Bruno and San José Roads; and University Mound Tract (U. M. T.), west of San Bruno Road, five miles from the City Hall. See, also, Prominent Places, end Street Directory.

(b) Street not opened. (c) Fractional blocks, one hundred numbers allowed for first two blocks. (d) Fronting the bay. (e) Street ends. (—) Street does not cross. B. H., Bernal Heights. U. M. T., University Mound Tract. S. S. F., South San Francisco. A blank is used where the number at the crossing of a street could not be ascertained.
